Description of place(s) where proposed activity to be carried out and proposed status (s.39(b))
This concession allows for the concessionaire continue the use of 14 crossing points on Spec Creek within existing paddocks, to continue occupation of a pump shed with associated intake pipes and electricity supply and the transport of water associated with the use of an approved water take on Spec Creek.

Description of potential effects of proposed activity and any actions proposed to avoid, mitigate or remedy any adverse effect, (s.39(c)) noting the requirements of s.51(3)(a) and s.51(2)(d) CPLA: There will be no significant adverse effects as this concession is formalizing the continuation of farm access routes and a water pump facility that have been used for many years. A new ORC approved water take will have a negligible impact on the MS.

Details of the proposed type of concession: Concession (licence) under part Section 17Q(1) of the Conservation Act 1987.

Proposed duration of concession and reasons for proposed duration (s.39(e))

Proposed duration: 60 years from settlement of the tenure review of P197.

Reasons for proposed duration: As the farming operation is expected to continue into the future and the easement routes provide essential links between two parts of the same

paddocks, it is considered that exceptional circumstances warrant the longer term. There are no other practical access routes apart from across the marginal strip. The pumphouse is already in existence.
